Introduction

This course will help health professionals provide expert assistance to apply the Public Health Approach (PHA) and use evidence-based and evidence-informed strategies to reduce gun violence. Gun violence includes murder/homicide, assault, injury, robbery, assault, domestic violence, suicide, unintentional and accidental shooting.

CUT GUN DEATHS & INJURIES IN HALF BY 2025

 Public Health Approach - Many professional health organizations urge using PHA.
 2025

 The course follows an outline of the PHA key components to: 1) define and monitor
 2045

 the problem, 2) identify risk and protective factors, 3) develop and test prevention strategies, and 4) assure adoption.
 2025

Evidence-Based Strategies - There may be well over 250 evidence-based (EB) and evidence-informed (effective and promising) strategies for health professionals to use or adapt. Being able to find ones for your interests is covered in this course. CDC has two excellent online courses specifically related to violence prevention. You will take the "**Principles of Prevention**" and the "**Evidence Based Decision Making**" courses. Separately from this course, you can get an <u>additional free 2.5 continuing education</u> hours from CDC. You will need to sign-up on your own during or after this course with CDC and complete CDC's evaluation and test.

2nd Amendment and US Constitution - Concern for the "right to bear arms," "gun rights" and fear that "gun laws" might lead to confiscation permissible laws are covered thoroughly. The **2nd Amendment and Supreme Court** decisions give guidelines for laws that are is permissible. How background checks are done is covered in the course. Knowing the history and interpretation of the 2nd Amendment and Supreme decisions may help you understand and work with potential opponents.

Potential partners and stakeholders, allies and opponents are studied.

Some required reading and a lot self-selected reading. It may appear that there is a too much to study but remember you get to review each section and, in most of them, select items you find most interesting and may be useful in your work. The test (link on first page) has True/False, multiple choice questions and asks for very brief descriptions of what you selected to study and how you might use the information.

Section	
1. The Public Health Approach (~1 hour)	3
2. Principles of Prevention (from CDC's Division of Violence Prevention, ~ 2 hours)	5
3. Evidence Based Decision Making (from CDC's Division of Violence Prevention, ~2 hours)	7
4. Define and Monitor the Health Problem of Gun Violence (~1 hour)	9
5. Risk and Protective Factors that Promote and Prevent Gun Violence (~1 hour)	12
6. The 2nd Amendment - History, Interpretations, Gun Laws can be Constitutional (~1 hour)	16
7, Implemented Strategies: President Executive Order, Congressional & State Legislation (~1.5 hour	s) 17
8. Public Health and Other Organization Promoted Prevention Strategies (~1.5 hour)	19
9. Health Education Strategies (~1 hour)	21
10. Potential Collaborative Relationships for Widespread Adoption (Allies and Opposition) (~1 hours))23
Test Instructions (0.5 hour)	25
About the Course Developer - Jim Grizzell	25

Two Ways to Find the Study Assignments and Time Estimates

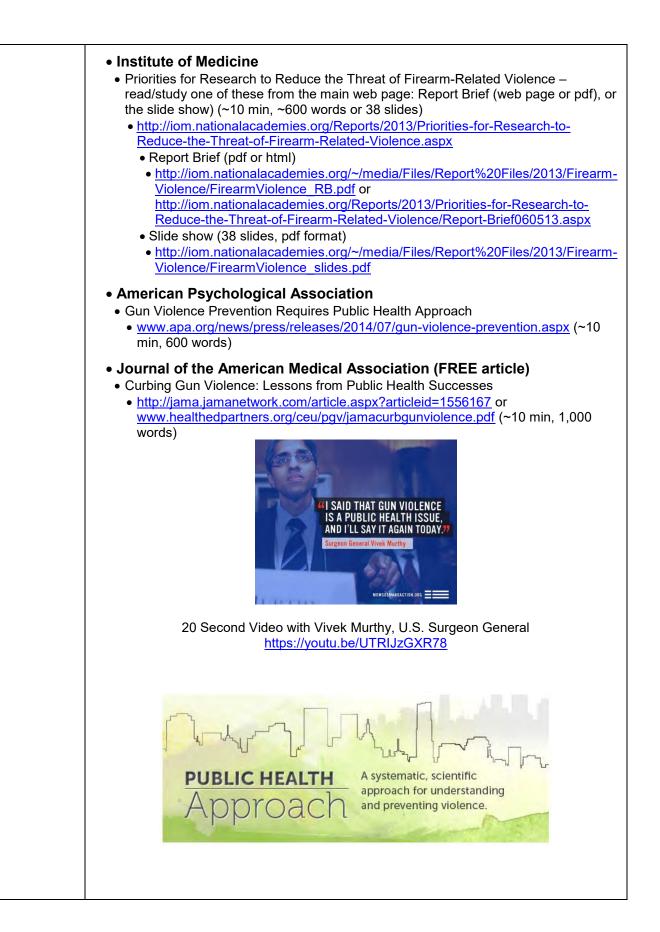

1. Keep this Study Guide opened on your computer to be able to click on the links in the Study Guide.

2. Follow instructions on a printed copy to get to assignments.

Time to complete the course includes two components.

1) Estimated time to read text based on reading speeds of 250 words per minute (wpm) to faster speed at 300 wpm and 2) An additional 10% to 20% of time is allowed for skill development learning to navigate to and open web pages.

Estimated Time	Sections, Objectives and Assignments
~0.5 hour	 Introduction Thoroughly Review and prepare to use this Study Guide. Remember to look for the instructions for required reading, and other reading/studying to tailor the course for your needs, interests and your work. (~30 min)
~1.0 hours Objectives match the NCHEC responsibil- ities and competencies for CHES and MCHES. Read / study all materials in this section.	 Section 1: Prevent Gun Violence with the Public Health Approach After studying the materials the participant will be able to: Apply theories and models to develop assessment strategies, critique sources of health information, and identify gaps in data using theory and evidence from the literature (1.1.3, 1.2.2, 1.2.4, 4.1.7, 4.1.10) Select planning models for health education (2.2.3) Design and apply theory-based strategies and interventions to achieve objectives (2.3.1, 3.1.6) Use learning theory to develop or adapt training programs (6.2.6) Study Assignment Read/study the CDC, IOM, APA and JAMA web pages and articles describing PHA. (~60 min) Center for Disease Control and Prevention (CDC) The Public Health Approach to Violence Prevention (read web page or 2-page pdf file) www.cdc.gov/ViolencePrevention/overview/publichealthapproach.html or www.cdc.gov/ViolencePrevention/pdf/ph_app_violence-a.pdf (~10 min, 800 words) The Public Health Model Meant of the problem Meant of the problem of the problem of the problem of the problem of the problem<

2.0 hours

You can get an additional free 1.5 continuing education hours from CDC for completing this section.

See instructions at the end of this section and at the POP web site.

NOTE: four test questions for this selfstudy course are the same is those used in the CDC "Principles of Prevention" and Understanding Evidence courses.

Consider taking notes. The CDC test questions do make us think and apply what is taught.

Section 2: Principles of Prevention

After studying the materials the participant will be able to:

- Select planning models for health education (2.2.3)
- Design theory-based strategies and interventions to achieve objectives (2.3.1)
- Apply theories and models of implementation (3.1.6)
- Use evidence-based research to develop policies to promote health (7.5.4)

Study Assignment

- Complete the CDC "Principles of Prevention" (POP) course. At the beginning of the POP course choose to take the course for up to 1.75 free from CDC continuing education hours (CEUs depend on your certification or license, 1.5 CECH for CHES/MCHES). These are in addition to this self-course.
- CDC Injury Prevention & Control: Division of Violence Prevention
 - Principles of Prevention Introduction video (~2 min)

🥗 VetoViolence™

 <u>http://vetoviolence.cdc.gov/apps/pop/</u> (at end of the video the next page should open automatically)

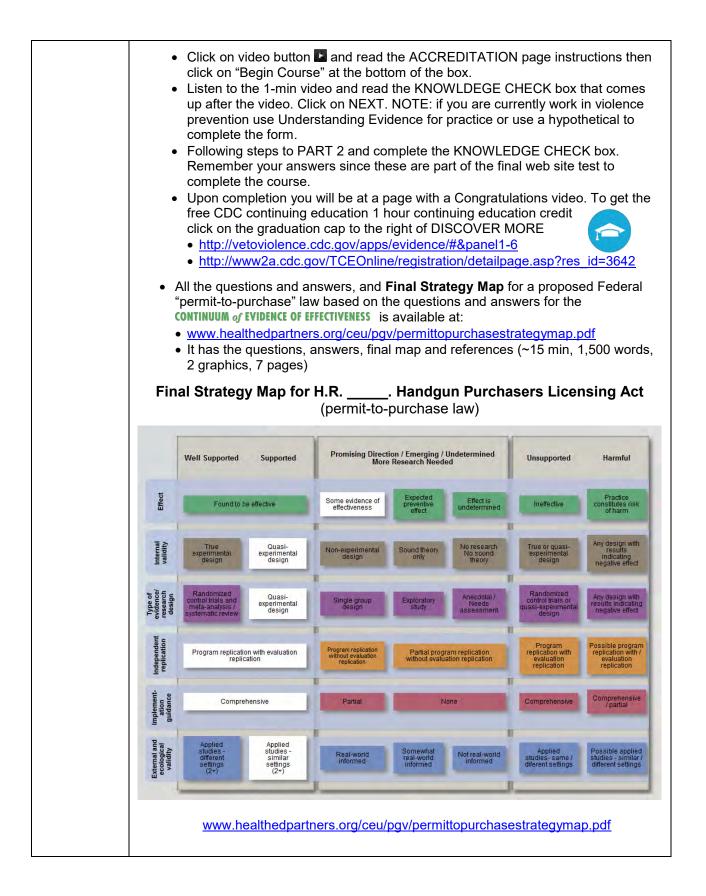

- Principles of Prevention (POP) Continuing Education Course
 - http://vetoviolence.cdc.gov/apps/pop/prevention-main.html (~90 min)
 - At the end of POP, you will be able to:
 - Define violence
 - Describe the burden of violence in the United States
 - Distinguish primary Prevention from secondary and tertiary prevention
 - Identify the 4 levels of the Social Ecological Model

- Describe the public health approach to violence prevention
- Follow the instructions on the "WELCOME TO" and to "Launch" the course.
- You may find that you cannot go back to previous videos or small segments but can click on major sections. It does take about 90 minutes to go through the entire course and take the quizzes.
- Click on the one of the two options and follow the instructions on the **Continuing Education and Certificate of Completion** page for the 1.5 free CEU hours from CDC or the **Exploring Only** page. - Continue to page 6.

2 hours Section 3: Evidence and Decision Making to Prevent Gun Violence Understanding You can get Increasing emphasis has been placed on the importance of FVIDENCE an additional evidence in guiding violence prevention efforts. Evidence is free 1.0 extremely important for researchers, health education specialists, continuing practitioners, and policy makers charged with making decisions education around funding and implementing violence prevention strategies. hour from /etoViolence CDC for After studying the materials the participant will be able to: completing Critique sources of health information using theory and evidence (1.2.2) this section. Assess the quality and efficacy of interventions, policies and strategies to ensure consistency with objectives (1.6.2, 2.3.1) To get this Develop evaluation/research questions (4.1.1, 4.1.2) free Assess the merits and limitations of qualitative and quantitative data collection for • continuing research (4.1.6) education • Collect, analyze and interpret evaluation and research (4.3, 4.4) hour you Analyze factors that influence and advocate initiatives to decision-makers (7.1.4, • must 7.4.9, 7.4.10) complete all • Use evidence-based research to develop policies to promote health (7.5.4) the lesson modules. See #12 of FREQUENTLY ASKED QUESTIONS (FAQS) and/or CDC Injury Prevention & Control: Division of Violence Prevention instructions at Using Different Types of Evidence in Decision Making the http://www.cdc.gov/features/UnderstandingEvidence/index.html (~10 min, ~500 DISCOVER words) MORE sections after Understanding Evidence – a part of CDC's VetoViolence[™] completing • http://vetoviolence.cdc.gov/understanding-evidence (~1 hour, get 1 free CEU the course. from CDC • This site will help you use evidence based decision making as you think about ways to prevent gun violence in your community. Read the page, watch the Homepage video and complete the entire learning module. • There is a flow – learn about each type of evidence (Best available research, experiential, contextual) and be sure to be patient – the short videos may take a few more seconds than expected to load and start. • NOTE: You can use the site setup a profile as a guest or by creating an LOG IN account from the LOG IN button. If you do make an account you can get the "Continuum of Evidence of Effectiveness" for a strategy (a strategy map for "permit to purchase" policy is available at the end of this section it has the white boxes showing how effective your proposed strategy might be). • Follow the instructions below and on the web site to get start. Once you finish Part 1 you should be able to go through CDC's learning module fairly smoothly. • Click on GET STARTED ► and read the instructions. Go through the INTRODUCTION – Introduction to EVIDENCE BASED DECISION-MAKING

1.0 hour	 Section 4: Define Firearms Violence as a Health Problem After studying the materials the participant will be able to: Access, collect quantitative and qualitative baseline, identify gaps information and data related to gun violence (1.2, 1.2.4, 1.3, 3.1.2) Assess merits and limitations, analyze data, and synthesize data for reporting and support advocacy messages (4.1.7, 4.3, 5.2.4, 7.4.5) Use evaluation and research finding in policy analysis (7.5.1) Use evidence-based research to develop policies to promote health and prevent gun violence (7.5.4)
In this section, read and study	 Study Assignment Take about one (1) hour studying and reviewing some of the data sources and data available that are of interest to you and which you might use in your work. In that hour try to review several data sources (BOJ, CDC, FBI, NIJ, Healthy People 2020, etc.) for gun violence reports and data. Reports you can select from include those on mortality, homicide, suicide, robbery, assaults and injury. For the test be prepared to very briefly (<!--= 50 words) describe what you learned and might use. (~1 hour)</li-->
data sources of your choice.	 Bureau of Justice Statistics (BOJ) Firearm Violence, 1993 – 2011, press release, Special Report (28 pages, pdf) www.bjs.gov/index.cfm?ty=pbdetail&iid=4616 www.bjs.gov/content/pub/press/fv9311pr.cfm (good quick summary) www.bjs.gov/content/pub/pdf/fv9311.pdf

1.0 hour	 Section 5: Risk and Protective Factors After studying the materials the participant will be able to: Examine relationships among behavioral, environmental factors that promote or prevent firearm violence and safety (1.4) Examine factors that enhance or compromise the health education process (1.6) Assess social, environmental and political conditions that may impact health education (1.6.4) Assess the need for resources to foster health education (1.6.6)
	Study Assignment Spend an hour reading/studying the topics of interest to you. Consider how they may relate to the four levels of the Social-Ecological Model taught in the Principles of Prevention. Be prepared to write very brief (<!--= 50 words) description of what you learned and how the factors reviewed may be a risk and or protective factors. (~1.0 hour)</li-->
	 Affordable Care Act Wellness Programs. Sec. 1001(e). PHSA sec. 2717. Reporting Requirements for Group Health Plans/Gun Ownership. " wellness and health promotion activity cannot require disclosure or collection of any information relating to the presence or storage of a lawfully possessed firearm or ammunition in the residence or on the property of an individual; or the lawful use, possession, or storage of a firearm or ammunition by an individual." 	• <u>www.ncbi.nim.nim.gov/pubmed/22300781</u>
	 Gun Industry Support of NRA (gun makers need to increase sales due to shrinking market)
	 There appears to be a decrease in demand for buying guns. Fewer
	households have guns (~49% in early 1970s, ~32% to mid-40% in 1914),
	less personal gun ownership (28% in 1980, 22% in 2014), fewer hunters
	(32% in 1977, 15% in 2014) http://www.vpc.org/studies/ownership.pdf
	• It appears ~68% of NRA revenue comes from sources other than members.

Stand Your Ground (Shoot First) Laws
 Laws which give individual an expanded right to use deadly force in potentially danger encounters with no duty to retreat.
• The Association of Prosecuting Attorneys raised concerns that shoot first laws,
arguing that they inhibit the ability of law enforcement and prosecutors to hold
 violent criminals accountable, may encourage vigilante behavior. <u>http://smartgunlaws.org/stand-your-ground-policy-summary/</u> (~10 min, 2,000
words)
Trafficking and Straw Purchases
Gun trafficking is the diversion of guns from lawful commerce into the illegal market. This includes corrupt gun dealers ("bad
apples" per Brady Campaign). A "straw purchase" occurs when STOP BAD APPLE
the actual buyer of a firearm buys for another person.

~0.5 hour	Take test and answer evaluation questions in the Adobe Reader form
	Use Adobe Reader DC to open and take the test. It allows you to see your score as you answer questions. Click on the icon or the link below to get the free program.
	https://acrobat.adobe.com/us/en/products/pdf-reader.html
	Download and save the test from this link: www.healthedpartners.org/ceu/pgv/pgvtest.pdf
	 IMPORTANT – don't try to complete the test in your browser (e.g. Explorer, Chrome, Firefox) Download or Save the test from your browser to your computer or a flash drive. Remember where it is. Save for your records and submission after completing test. Start Adobe Reader DC Open the Adobe test form with Adobe Reader DC NOTE: Be sure you are not using another pdf form reader (test answers may not be visible after saving, the "Submit" button will not work to send the test data) Take the test (scroll to page one of the last pages to see your score, correct answers if desired) Save the test again to your computer or a flash drive. Two ways to attach to an email or submit your test (depends on email program) a. Attach to email to <u>ce@healthedpartners.org</u> (best if you use gmail, yahoo, live, comcast, or other internet based email programs b. Or "Submit Form" button only if you use Microsoft Outlook
	About the Course Developer
	Jim Grizzell, MBA, MA, MCHES, EP-C ACSM, FACHA
	Jim is a 55+ year and Life Member of the National Rifle Association. He became a Certified Health Education Specialist (CHES) in 1991 and Master CHES (MCHES) in 2011.
	Jim started target rifle shooting in the 1950s, won the Hearst Trophy for high ROTC cadet in the 1969 National Rifle Matches, was a collegiate All-American team twice while on the University of Wyoming varsity rifle team, and trained on the All Army Rifle Team. After the Army rifle team he commanded a unit in Germany that was to deliver nuclear warheads by helicopter to the artillery if we went to war. He left the Army as a Captain after 6 and a half years. He owns and safely stores two rifles – target air rifle and 22 caliber target rifle. Gun law trends Jim has seen are that the NRA supported background checks until about the year 2000 (see 14 second CSPAN video of NRA's CEO Wayne LaPierre, <u>https://youtu.be/M-oqfPojhec</u> . The "gun control" advocates wanted to ban guns until about 2000. The NRA now opposes background checks and appears to be a gun industry organization attempting to sell more guns. The Brady Campaign and other gun violence prevention organization do not use the term "gun control" since safe use of guns by law-abiding citizens is legal.
